

# MetShape

Printing metals in ultra precision

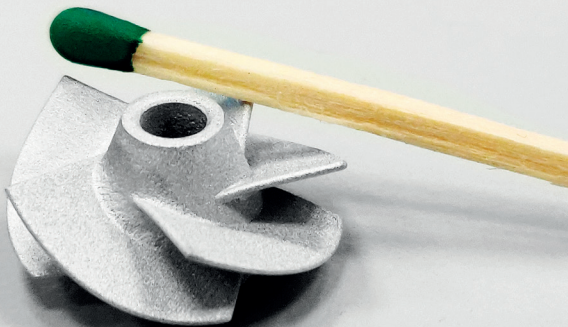

## OUR SERVICES

## SINTER SERVICE

Sintering is a process technology that requires a high level of individual expertise to achieve the optimal results. The size, material, shape and orientation of a component have an enormous influence on a sintering application and must therefore be taken into account when developing a sinterbased application.

**SINTER  
SERVICE**

## **ORDER SINTERING**

We offer services for debinding and sintering your green parts. Our flexible equipment enables debinding and sintering of green parts from a large variety of production processes and materials.

## **DEBINDER & SINTER DEVELOPMENT**

We develop suitable debinding and sintering processes for your green parts at the highest level.

## **RENT SINTER CAPACITY**

We offer our capacities for sintering with your sintering programs.
